OBJECTIVE

IT specialist , Developer and Integration Testing Engineer. With my strategy and hands-on experience, I have led project teams and written efficient and scalable code. My experience spans Back-end development, Integration testing, Content creation and many other cutting-edge technologies.

EDUCATION

Bachelor Degree in Information Technology, Saba University   *2021 - 2024*
Graduated with 3.60 GPA.
International Computer Driving License, New Horizons   *2021*
English Language, Yemen America Language Institute   *2019*

EXPERIENCE

Developer & Integration Engineer   *2024 - now*
Revolution of Technical Solutions Company   Sana'a, Yemen
- Developed Web APIs using ASP.NET, and used Git/Azure Dev-Ops for all code version control. And collaborated closely with cross-functional teams to optimize API performance and enhance overall system reliability.
- Conducted rigorous integration testing on system APIs, identifying and resolving issues to ensure robust functionality and performance.
- Executed Agile Scrum practices, including daily stand-ups, sprint planning, and retrospectives, to boost collaboration and efficiency.

Leader & Speakers   *2022 - 2023*
Google Developers Student Club - Saba University
- Founded and led a club collaborating with experts from diverse Middle Eastern countries to design and implement educational courses locally and internationally.
- Organized a series of events and activities focusing on the forefront of technological advancements, creating forums for knowledge exchange and exploration of the latest trends.

TRANINGS

IT Intern & Administration   *2020 - 2023*
Yemen Center Information Technology in Higher Education
- During my stint as a trainee at the Information Technology Center in Higher Education, I fine-tuned both administrative and programming skills. This hands-on experience allowed me to actively participate in various projects across different business areas, showcasing adaptability and contributing meaningfully to each endeavor.

PROJECTS

OHM Technology App. Built a smart voice assistant application that leverages AI to understand and respond to user voice commands. The app includes user authentication (account creation and login), voice recognition, AI-powered response generation, and task automation features. Technologies used: Python, Speech Recognition APIs, Natural Language Processing (NLP), Flutter (for UI).

Personal Portfolio. Designed and developed a modern, responsive personal portfolio website to showcase my skills, experience, and projects in software development and AI. Built using Next.js with React server components and server actions to ensure fast performance and seamless user interactions.

CERTIFICATIONS

- CCNA: Switching, Routing, and Wireless Essentials, By General Telecommunication Institute with Cisco (2025)
- Introduction to Technology-Assisted Decision-Making, By University of Leeds (2025)
- First Scientific Conference on Emerging Technologies of Trusted (IOT), By University of Sana'a (2024)
